

NEIGHBORHOOD GOLF CARTS – JANUARY 2026 EOM REPORT

January 2026 — Topline Health Snapshot

Total completed jobs: 47

Total month revenue: \$26,406.58

~\$382 DEV ✓

Average revenue per job: \$561.84 ($=\$26,406.58 / 47$)

Gross profit (GP): \$12,768.69

~\$323 DEV ✓

Gross margin: 48.35%

Average GP per job: \$271.67 (matches Staff Hours Report)

Cost structure (from JAN_GP total row)

- Labor cost: \$3,902.37
- Service cost: \$12,717.40
- Material cost: \$8,428.74
- Miscellaneous: \$1,306.78
- Total cost: \$13,637.89

Read: Margin is strong overall for January, but the business is **heavily cost-weighted to “Service cost” + “Material cost”** (together they are the majority of total cost). That’s not automatically bad—just means GP is being won/lost on parts/service COGS control and pricing discipline at the job level.

Revenue cadence (daily completion report)

The daily report lists **31 calendar days**, but **11 days show \$0 revenue**, meaning **20 revenue-producing days**.

- Avg revenue per revenue-producing day: \$1,320.33
- Avg revenue per calendar day (Jan 1–31): \$851.83

Read: Work is clustered; there’s room to smooth the calendar (dispatch density and scheduling discipline) to reduce travel waste and increase billable concentration per day.

Zip Code Performance (where the money came from)

Top zip codes by total revenue

1. **70433: \$8,358.35 | 14 jobs | Avg job \$597.03**
2. **70447: \$4,741.41 | 9 jobs | Avg job \$526.82**
3. **70122: \$2,707.00 | 1 job | Avg job \$2,707.00**
4. **70706: \$2,498.00 | 1 job | Avg job \$2,498.00**

NEIGHBORHOOD GOLF CARTS – JANUARY 2026 EOM REPORT

5. 70448: \$1,190.07 | 2 jobs | Avg job \$595.04

Concentration (important)

- Top 2 zip codes (70433 + 70447):
 - 49.61% of total revenue
 - 48.94% of total jobs
- Top 5 zip codes:
 - 73.83% of total revenue
 - 63.83% of total jobs

Read: January performance is **geographically concentrated**. That's good for marketing efficiency (you know where the responsive demand is), and it's also an opportunity: tighter scheduling within those zips should cut travel time per completed dollar.

Staff Hours, Travel vs Onsite, and Utilization

Total hours (all staff)

- On-job hours: 96.5 hrs
- Travel hours: 37.6 hrs
- Total field hours: 134.1 hrs
- Travel share of field time: 28.0% (37.6 / 134.1)

Efficiency ratios (whole business)

- Revenue per on-job hour: \$273.64/hr
- Revenue per total field hour (on-job + travel): \$196.92/hr
- GP per on-job hour: \$132.32/hr
- GP per total field hour: \$95.22/hr

Read: A 28% travel fraction is meaningful. Any dispatch improvement that reduces travel without reducing volume will lift effective hourly output fast.

By employee (from Staff Job + Staff Hours reports)

Payton Elkins

- 30 jobs
- On-job: 78.0 hrs | Travel: 22.6 hrs | Travel %: 22.5%
- Hrs per tech per job: 2.6

NEIGHBORHOOD GOLF CARTS – JANUARY 2026 EOM REPORT

- Avg gross profit (per job): \$391.87
- Profit margin: 51.06%
- Revenue per field hour: ~\$255.79/hr

Ryan White

- 17 jobs
- On-job: 18.5 hrs | Travel: 13.0 hrs | Travel %: 41.3%
- Hrs per tech per job: 1.0
- Avg gross profit (per job): \$59.57
- Profit margin: 29.95%
- Revenue per field hour: ~\$107.33/hr

Operational read (no fluff):

- Payton is carrying the profitability load and has a healthier travel ratio.
- Ryan's time mix is travel-heavy and job economics are materially weaker (lower margin + lower GP/job). This is common when an owner is doing quick visits, triage, follow-ups, non-billable customer interface, or low-dollar stops.

Data integrity note (important)

The Staff Job Report revenue by employee does not reconcile to total revenue:

- Payton revenue + Ryan revenue = **\$29,113.58**
- Total revenue = **\$26,406.58**
- Difference = **\$2,707.00** (exactly one high-dollar zip-code job: **70122**)

Conclusion: At least one job's revenue is being attributed to **multiple employees** (shared job / helper assignment / multi-tech tagging). This is fine, but it means **employee revenue totals cannot be used for true "revenue share"** unless we de-duplicate by job ID. One of Payton's jobs had mixed in / carry over from Jake's work on the same job.

NEIGHBORHOOD GOLF CARTS – JANUARY 2026 EOM REPORT

Conclusions — January Business Health

1. **Topline is solid for January:** \$26.4k revenue at ~48% gross margin is healthy for a winter month.
2. **Zip concentration is strong and actionable:** half of revenue and jobs are in 70433/70447 — this should directly inform dispatch zoning and marketing spend.
3. **Travel time is a major lever:** 28% of field time is travel. Reducing that even modestly increases output without adding headcount.
4. **Owner time is not being monetized efficiently (in these reports):** Ryan's travel fraction and low GP/job strongly suggest his hours are being spent on work that should either be (a) priced differently, (b) delegated, or (c) converted into higher-value roles (sales close, estimating, upsell, route density planning).

Immediate Recommendations (practical, dispatch + financial)

- **Route density rule:** build the week around **70433 + 70447 blocks**, stacking same-zip calls on the same day whenever possible.
- **Minimum dispatch economics:** set a **minimum job ticket threshold** (or enforce trip fee + minimum diagnostic) for any stop that looks like it will land under target GP/job.
- **Owner utilization:** push Ryan toward **high-conversion activities** (estimates that close, fleet accounts, high-dollar diagnostics, lithium consults), and reduce low-dollar single-stop travel.

//

Neighborhood Golf Carts (NGC) — January 2026 P&L; Review (Cash Basis)

Prepared for client delivery • Source report run Feb 7, 2026 (QuickBooks P&L; % of Total Income)

Executive Summary

January closed profitable: **\$4,130.67** net income on **\$37,923.15** revenue (**10.89%** net margin). Reported gross margin is **63.16%**; after correcting misclassified COGS overhead, KPI gross margin is **~67.18%**.

Key Metrics

Metric	Amount	% of Income
Total Income	\$37,923.15	100.00%
COGS (reported)	\$13,969.19	36.84%
Gross Profit (reported)	\$23,953.96	63.16%
COGS (adjusted KPI)	\$12,445.58	32.82%
Gross Profit (adjusted KPI)	\$25,477.57	67.18%
Operating Expenses	\$20,008.02	52.76%
Net Income	\$4,130.67	10.89%

COGS Cleanup (Reclass to Operating Expenses)

Item currently in COGS	Amount	Move to (OPEX)
Merchant Account Fees	\$630.04	Bank/Merchant Processing Fees
Software Expense	\$482.36	Software & Subscriptions
Shop Supplies	\$389.74	Shop Supplies / Overhead
Small Tools	\$21.47	Small Tools (expense)
Total reclass (KPI only)	\$1,523.61	

Close-Out Items & CFO Recommendations

- **Clear Unapplied Cash Payment Income (\$1,251.32):** apply payments to invoices/jobs to avoid overstated income and misstated AR.
- **Refund posted as positive income:** confirm vendor refund vs customer refund and post as contra-expense or negative revenue.
- **Normalize revenue categories:** cart sales are split across multiple income lines; tighten mapping for consistent KPIs.
- **Marketing ROI discipline:** track cost per booked job and cost per cart sold; adjust spend if lead quality drops.

Note: Reclassifications above change gross margin presentation only; Net Income is unchanged.
