

Student Handout — Resources & Further Learning

OEM training pathways

- **Club Car** — dealer / authorized technician courses (contact regional rep)
- **EZ-GO (Textron)** — authorized service training
- **Yamaha Golf Car** — dealer technician programs

Always obtain the **exact model-year service manual** for the cart being serviced.

Controller / fault codes

- Curtis Instruments Fault Code Translator: <https://faultcodes.curtisinstruments.com/>
- Keep model-specific PDF charts in the shop binder

Communities & media (use critically — verify against OEM)

- Forums: Cartaholics.com, GolfCartResource.com, Reddit r/golfcarts
- YouTube: search brand-specific repair channels; validate steps against manuals
- Battery University — lead-acid & lithium fundamentals

Program habits that beat random videos

1. Correct diagram first
2. Measure with units
3. 7-step process
4. Diagnose before replace
5. Never bypass HPD/interlocks for delivery

After graduation — suggested next skills

- OEM lithium/BMS tool certifications as available
- Advanced soldering/connector repair
- Fleet PM software / work-order systems used by your employer
- Gas EFI diagnostics only with proper tooling and training
