

NEIGHBORHOOD GOLF CARTS

Hiring Quiz Answer Key · EVALUATOR ONLY · Version 1.0

Do not give to candidates. Pass = 90/120 (75%). Critical ★ = Q1–Q6; miss 2+ ★ = automatic fail.

Q	Ans	★	Rationale
1	B	★	Safe prep before tools — not rushing into live work
2	B	★	Key-off ≠ proven safe
3	B	★	Jewelry short / burn risk
4	B	★	Tool across posts = spark/burn/fire risk
5	B	★	Never defeat safeties to “just test”
6	B	★	Verify before cutting/stripping
7	B		Eye protection is normal bay habit
8	B		Hydrogen + spark hazard when charging LA
9	B		Meter = voltage / path checks
10	B		Volts = electrical pressure
11	B		Continuity ≠ proves cable OK under load
12	C		Series adds voltage (12+12=24)
13	A		Loose/dirty → drop, heat, dies under load
14	B		Resistance fights flow → heat
15	B		Proper meter use; no shorting posts
16	B		Find cause; correct fuse size
17	A		OK OCV / fails under load → weak pack
18	B		Distilled water + acid safety per shop rules
19	B		Clean & tighten (safely)
20	B		Wrong charger chemistry = unsafe
21	B		BMS protects / may shut down
22	A		Power & connections before motor
23	A		Series raises voltage
24	B		Swollen/hot/smell = stop & escalate
25	B		Verify + safe + power — not shotgun controller
26	A		Load behavior + connections
27	B		Manuals, step-by-step, ask lead
28	A		Drop between pack and controller
29	B		Shotgun = parts without proof
30	B		Clear findings for office quote
31	B		Intermittent connector → repair properly
32	B		Ask at safe stop-point
33	B		Tires/brakes/steering walk-around
34	B		Dragging brake mimics “weak battery”
35	A		Soft tires = drag + unsafe handling
36	B		Hardware control / reassemble right
37	B		Loose wheel = do not drive
38	A		Lithium: matching charger + BMS; no watering cells
39	B		Protect/shutdown before blaming motor
40	B		Escalate to lead/office — don't hide problems

Convert to scorecard W: 90%+=4 · 75–89%=3 · 60–74%=2 · under 60%=1. Transfer to Hands-On Evaluation Scorecard.

EVALUATOR ONLY — do not photocopy for candidates
