

Technician 9-Step Bay Cheat Sheet

Neighborhood Golf Carts · NGC-OPS-TECH-092026R0 · Do these nine steps in order on every job

BAY COPY
SEP 2026

Core rule: **Test before replacement** · Document before assumption · Verify before completion

1 REVIEW

Read the HCP job, customer complaint, and history before you touch the cart.

2 INSPECT

Walk the cart; photo as needed; keep Main Job separate from courtesy findings.

3 DIAGNOSE

Test before replacement. Find root cause with measurements — not parts guessing.

4 REPORT

Hand Admin complete estimate support (NGC-EST-1): cause, correction, parts, labor, safety.

5 REPAIR

Do only authorized Main Job / associated operations. Stop for additional work (\$12).

6 VERIFY

Confirm the complaint is gone (functional + road test as applicable) before calling it done.

7 QC

Tech QC in the bay. Catch misses before the cart leaves your stall.

8 DOCUMENT

Write tests, findings, parts, and verification in HCP notes. Document before assumption.

9 COMPLETE

Notes in, tools/parts accounted, ready for Admin / delivery QC.
