

Technician 9 Steps — Cheat Sheet

CORE STANDARD

Test before replacement · Document before assumption · Verify before completion

1**REVIEW**

Confirm the customer complaint, job notes, and what is authorized before touching the cart.

2**INSPECT**

Do the courtesy / visual check. Note safety items separately from the main job.

3**DIAGNOSE**

Test first. Capture meter readings, fault codes, and evidence before guessing parts.

4**REPORT**

Tell Admin what you found, parts needed, safety yes/no, and labor time.

5**REPAIR**

Do only authorized work. Main job first, then required related work.

6**VERIFY**

Road-test / function-check so the complaint is fixed and the cart is safe.

7**QC**

Run technician self-QC. Catch misses before the cart leaves the bay.

8**DOCUMENT**

Write clear Housecall Pro notes: complaint, tests, evidence, repair, verification.

9**COMPLETE**

Job is done only when review → complete is finished — not just because a part was swapped.
