

Lab W03 — Charger Troubleshooting Worksheet

Student: __ **Date:** __ **Charger ID/Model:** __

Cart/Pack: __ **Chemistry:** ☐ Flooded LA ☐ AGM ☐ Lithium

Symptom (circle)

No charge · Slow charge · Won't finish · Overcharge symptoms · Intermittent · Other: __

Isolation path (record in order)

Step	Check	Reading / Result	Pass/Fail
1	AC power present at outlet		
2	AC present at charger input		
3	DC connector seated / polarity correct		
4	DC voltage at charger output (no/light load as safe)		
5	DC current into pack (if clamp available)		
6	Interlock/enable circuit status		
7	Pack acceptance (pack voltage / BMS enable)		
8	Error LEDs / codes (if equipped)		

Decision

Root cause: _____

Repair / recommendation: _____

Verification after repair: _____

Instructor initials: _
