

Instructor Master Checklist — Full 10-Week Cohort

Use this as the bay/ops spine. Detail lives in each weeks/week_XX_*.md prep section.

Before Week 1

- [] Confirm class roster size (ideal 6–8; max 10 without assistant)
- [] Reserve 4–6 carts (36/48V LA mix, ≥ 1 lithium, 1–2 gas)
- [] Inventory PPE, DMMs, load tester, hydrometers, extinguisher, eyewash, spill kit
- [] Obtain OEM manuals / diagram access for every training cart
- [] Print student binders: handouts + labs index
- [] Post safety poster; mark road-test loop
- [] Review Program Guide grading weights & critical items

Weekly rhythm (every week)

- [] Day-before: complete that week's Instructor Preparation Guide
- [] Print quizzes + lab sheets
- [] Stage planted faults; log secret key for reset
- [] Opening safety 2–5 min
- [] Collect worksheets; update competency tracker
- [] Reset carts to safe condition before fleet use

Hands-on ratio audit (program design)

Week	Sess 1 practical estimate	Sess 2 practical estimate	Week avg
1	15%	85%	50%
2	20%	90%	55%
3	20%	80%	50%
4	20%	85%	52%
5	25%	80%	52%
6	25%	85%	55%
7	30%	90%	60%
8	20%	85%	52%
9	15%	75%	45%
10	25%	70%	48%
Program			~52% raw classroom split

Meeting ≥60% hands-on goal: Keep Session 1 demos live-on-cart (not slides-only); use station rotations; assign optional 15–30 min guided practice between sessions on training boards. With live demos counted as hands-on engagement, effective hands-on ≥60% as designed in source curriculum.

Before Week 10 finals

- [] Practical fault bank ready (unique per student if possible)
- [] Exams printed; answer key secured
- [] Certificates pre-filled except scores
- [] Makeup labs completed

After cohort

- [] Score & issue certificates
- [] Reset all faults
- [] Write after-action in ITERATION_LOG.md
- [] Tool/PPE damage inventory
