

Student Handout — Preventive Maintenance Checklists

Customize intervals to fleet hours and OEM schedules. Lithium tasks differ from flooded lead-acid.

Daily Pre-Use (Operator / Starter Tech)

- [] Tire condition & pressure (all four)
 - [] Obvious leaks / loose parts / damaged cables
 - [] Brakes & parking brake function
 - [] Lights / horn if equipped
 - [] Unusual noises on short move
 - [] Flooded: quick look for low water / wet acid trails
 - [] Lithium: charger connected overnight as policy; SOC not critically low
 - [] Steering responds normally
-

Weekly

- [] Clean battery tops (flooded); neutralize corrosion
 - [] Check/torque accessible battery connections to spec
 - [] Charger cords & receptacles inspection
 - [] Wash undersides if coastal/sandy (avoid pressure into bearings/controllers)
 - [] Brake adjustment check as applicable
 - [] Document hours / issues in log
-

Monthly

- [] Deeper cable/insulation inspection
 - [] Controller area debris / moisture check
 - [] Suspension bushings / steering play spot check
 - [] Transaxle seepage check
 - [] Accessory 12V systems / DC-DC (lithium conversions)
 - [] Review repeat fault codes / comebacks
-

Annual or 500-1000 Hour (as OEM/fleet policy)

- [] Full battery bank load test (flooded) / lithium health report

- [] Controller diagnostics / software if applicable
- [] Motor brush inspection (brushed motors)
- [] Brake lining measurements
- [] Transaxle service / fluid per OEM
- [] Torque audit critical fasteners
- [] Road test & sign-off
