Technician hire

15–20 minutes · Ryan

Golf Cart Technician — Phone Interview Scorecard

Purpose: Screen for transferable electrical/mechanical skill, diagnostic thinking, safety, and coachability. **Golf cart experience is a bonus — not a hiring gate.** Logistics (hours, commute, availability) are cleared on Indeed — skip unless inconsistent.

Candidate: _____ Date: _____ Interviewer: _____
Indeed / source: _____ Phone: _____ Call length: _____ min

Scoring scale: 1 = Unsatisfactory · 2 = Developing · 3 = Solid / trainable · 4 = Strong | **Advance if:** Safety ≥ 3, Diagnostic ≥ 3, and overall trainable.

1. ROLE FRAME · 2 min · no score — set expectations

■ Shop-only Covington repair + lithium conversions (no mobile) ■ Mon–Fri bay work under Ryan ■ Golf cart veterans not required — we train the product line ■ Strong fits get a 3–4 hr shop evaluation (written + hands-on + troubleshooting)

2. TRANSFERABLE BACKGROUND · 4 min · Score A

Prompts: Last 2–3 years of work? Auto / marine / RV / forklift / industrial / powersports / HVAC electrical? Any 12–48V+ DC or battery work? Multimeter use? Mechanical (brakes, bearings, steering)? Shop tickets vs field alone?

A. Transferable electrical / mechanical experience (High weight)

“3” looks like: Real DC or shop electrical plus mechanical exposure; can name systems they’ve troubleshot.

Notes: brands/systems _____

Score

1 ■ 2 ■ 3 ■ 4 ■

Background notes

3. DIAGNOSTIC THINKING · 6 min · Scores B–D · highest weight

B. No-go / won’t move

“A battery-powered vehicle won’t move. You don’t know the brand. Where do you start?”

B. No-go / won’t move (Highest)

“3” looks like: Verifies symptom → safety/visual → source voltage → path of power → what to measure next. Not “replace the controller.”

Score

1 ■ 2 ■ 3 ■ 4 ■

C. Weak / dies under load

“It runs a little then dies on hills. What are you trying to prove or rule out?”

C. Weak / dies under load (Highest)

“3” looks like: Resting vs loaded voltage, connections, pack health — then downstream. Not parts-chasing.

Score

1 ■ 2 ■ 3 ■ 4 ■

D. Learning unknown systems

“You’ve never seen this system. How do you learn it on day one without guessing?”

D. Learning unknown systems (Highest)

“3” looks like: Manuals/diagrams, ask lead tech, structured tests, document findings. Escalates instead of cowboyboying.

Score

1 ■ 2 ■ 3 ■ 4 ■

Diagnostic notes (listen for measure-before-replace)

4. SAFETY & ELECTRICAL JUDGMENT · 3 min · Score E · GATE — must be ≥ 3

Prompts: “You’re about to work on a high-current battery pack. What before tools go on?” Jewelry? Meter discipline? Short/arc risk? Bypass interlocks “just to test”? Any near-miss and what changed?

E. Safety & high-current judgment (GATE)

“3” looks like: Explicit caution: PPE mindset, isolate energy, meter discipline, no interlock bypass, respects pack energy.

■ FAIL SAFETY → do not invite to shop eval

Score

1 ■ 2 ■ 3 ■ 4 ■

Safety notes

5. SHOP HABITS & COACHABILITY · 3 min · Scores F–G

Prompts: How do you write up findings so the office can quote? Time you were wrong — what did you do? Comfortable being new on a product line if the process is clear? Steady ticket closer vs only “interesting” jobs?

F. Shop communication & documentation (Medium)

“3” looks like: Can explain findings simply; understands office needs estimate-ready notes.

Score

1 ■ 2 ■ 3 ■ 4 ■

G. Coachability & work style (High)

“3” looks like: Owns mistakes, asks for help, open to process; won't guess past a stop-point.

Score

1 ■ 2 ■ 3 ■ 4 ■

Fit notes

6. BONUS ONLY (optional) · Score H · does not gate the hire

H. Golf cart / lithium / BMS exposure (Bonus)

“3” looks like: Some cart, UTV, or lithium/BMS exposure. Absence is fine — leave blank or mark N/A.

Score

1 ■ 2 ■ 3 ■ 4 ■

7. TOTALS & DECISION

A Transferable	B No-go	C Load	D Learning	E Safety	F Docs	G Coach	H Bonus
_____	_____	_____	_____	_____	_____	_____	_____ / N/A

Core average (A–G, exclude H): _____ / 4 Diagnostic average (B–D): _____ / 4 Safety (E) ≥ 3? ■ Yes ■ No

■ ADVANCE

Safety ≥ 3, Diagnostic (B–D) avg ≥ 3, looks trainable → schedule 3–4 hr shop eval

■ MAYBE

Strong wrench, developing electrical; honest gaps → only if hungry; heavier hands-on day

■ PASS

Parts-swap habit, unsafe, or cannot describe troubleshooting they've owned

Next step if ADVANCE: shop evaluation — written knowledge (120), hands-on skills (120), troubleshooting & diagnostics (60). Ref: Hiring quiz evaluation – Technician.
